California Academy of Sciences

San Francisco

California

Chameleon = Phrynosoma coronatum
 Bejore = ^{Kordilera} Sceloporus zosteromus
 Bachira = Dipsosaurus dorsalis
 Culefrachinita = Bascanion flagellum frenatum
 Bachirgiana = Callisaurus draconoides
 Lagartija = ~~Cnemidophorus~~
 Tomalillo = Pitvophis vertebralis
 Cuclera sorda = Salvadora grahamiae
 Waco (Cap. Verde) = Verticaria beedingi
 Bejore Sepisna = Uta nigricauda

No 2090 Uta nigricauda

Throat lemon belly indigo blue
lightly spotted on side with very light
blue. Back dark gray to brown with
bands running across separated in the
middle by a ^{row of} small scales. Tail black.
Seems to prefer living in mesquite trees
and on rocks. Seldom found on the
ground.

1207 Uta trilineata in branch
(1/11/1917)

Color of body in life grayish
with black from head to middle of
body and black neck black
with transverse band of gray
throat spotted with black

850 Sceloporus zosteromus

Throat patch metallic
Indigo blue. w whitish
streak about 2 to 3 scales
wide down belly bordered
by Indigo blue blue bordered
by streak of light green 2 scales
wide. Sides grayish white
turning into brown on back
top of thighs and top of body
of tail straw colored

3298 Back grayish mottled with black
3 black transverse band across
Shoulders the hindmost largest
top of fore limbs black spotted with
gray top of hind limbs gray
mottled with black. Under surfaces
of limbs same as top of green region
black bordered with gray under
surface between front limbs black
belly grayish with mottled sides

831 Salamanders in stone

832 Salamanders

Found under shade of granite on large boulder on side of stream

The natives call them

Salamancas and ^{one} in death

fear of them. They say if you

pick one up your skin will

come off and their bite is

deadly poison. They are said

to be common

833 Salamanders found

near a small stream

from the Springs

by some we saw others like it

834 Salamanders found

835 Found under bark of granitic

(Ptilodactylus dulcis)

Valley

836 Salamanders

Head greenish blue

between shoulders on back 6 spots

of sky blue. Three get black transverse

lines beginning at shoulders and ending

midway between fore & hind limbs

the other side of each leg bordered

with one of orange yellow. Three

light brown of black transverse

of hind limbs, 15 dark green bands

green and black on tail bordered on

each side by orange band of light green

into light green to grayish banded

of line of black. Under surfaces

grayish except throat and belly halfway

down which is deep orange. Light

band spot in throat

837 Salamanders seem to inhabit only the

largest granite boulders when there

are numerous deep cracks and crevices

to hide in. They are somewhat shy

and on a rock keeps near a crack

into which it runs at the least

alarm. I have noted several jumps

from boulder to boulder fully 4 ft apart

Found these species in both trees and rocks, at San Pedro they were seen in trees at San Bartolo mostly on the large manna bushes with *V. thalassia* at Agua Caliente all in trees and fences. They are not often seen on the ground at any time. Stomachs of those collected contained *Myrmica* and *Formica* seem to be the staples and our guests took up as their activities. They go to eat. The species seem to be fairly common wherever they are.

... pulled out of sides.

Saw *Acridothera* with *Verreaux* in ...

5493 Purple band on back 6 scales side extending from between front legs to back of hind leg. Side scales bronze with red bases. Scales on belly green with black borders. Under surface on thigh green. Throat black with few green spots. Under surface of tail purple. Black patches on front of fore legs.

5494 Found from Cabo San Lucas to Los Santos, about 25 miles north of the Cape.

5546 Found in small rock pile of granite in mountain crevice. One of a pair probably. Saw one side but could not get a shot.

5547 Found under an old pine log in mountain crevice.

2802 Found in a rubbish heap
32 bands of orange red, 23 black
bands. Top of snout grayish
Under & surface grayish white

2804 Found in wood. Last all. Insects
ought a verticaria. Had head of
lipped in mouth.

2805 Found in a ~~...~~
under ~~...~~

2806 Found under dead ~~...~~

Found in creek between granite boulders on trail beyond Guamuclil Rancho and Todos Santos. Elevation 1500 ft., Guamuclil Rancho is in the mountains north of Cabo San Lucas.

Found on trunks of trees and cacti at Eureka Rancho. a few inches to a foot above ground, at sea level.

Found same data as 4967

Found in an orchard between large granite boulders in San Bartolo Canyon a few feet above ground. Elevation 4000 ft.

~~Found in the same place as 4967~~ Found between granite boulders in creek bed at Guamuclil Rancho.

Found under stones in piles of granite in small canyon back of Todos Santos. Elevation about 1000 ft.

Found under dead yucca on hillside back of Todos Santos. Elevation 1000 ft.
